Figures 6a and 6b. Object name editing and note editing capabilities
The current implementation of Radius supports three user-level object types, illustrated in Figure 7. Note objects contain text that can be edited freely by the user. Label objects are one-line textual markers that can be added anywhere to provide further information to the user. Apart from their names, always shown in boldface, labels do not store any other information or have any other special meaning. Stnk objects represent the subsinks of the
